

Example Mobile Release Notes

These release note details are for the **[App Name]** mobile app only. For information about web updates to the **[Platform Name]** platform, see **[Platform] Release Notes**. To ensure your company has full access to this release, make sure your company accepts current terms and conditions for both Android and iOS apps. For assistance, reach out to **[Product] Support**.

Mobile Version: 00.0.0

Release Date: [Month DD, YYYY]

New Features

iOS

Feature Updates

Feature	Details
Feature Name 1	Adds support for an additional calculation option within a built-in calculator tool.
Feature Name 2	Adds the ability to view sample reference files on a task, when made available by an administrator.
Feature Name 3	Updates the branding image displayed within a core application flow.

Android

Feature Updates

Feature	Details
Feature Name 1	Adds the ability to view sample reference files from an upload screen.
Feature Name 2	Changes the icon shown in the top navigation bar to use a company branding image instead of the default app icon.
Feature Name 3	Adds support for viewing an alternate frequency option when reviewing results from a calculator tool.
Feature Name 4	Adds a new experience that supports handling multiple related records within a single workflow.
Feature Name 5	Removes a permission that was previously required for a sharing feature, and adds support for receiving compatible files shared from other apps.

Bug Fixes

iOS

Feature Fix

Feature	Fix
Feature Name 1	Fixed an issue where a confirmation message would not dismiss when tapping its close icon.
Feature Name 2	Fixed an issue where a selection list would sometimes load duplicate pages of the same entries.
Feature Name 2	Fixed an issue where a user's own entry could appear more than once in a selection list.
Feature Name 3	Fixed an issue with a confirmation button after submitting a scanned file.
Feature Name 4	Fixed an issue that prevented adding a new task from a detail screen.
Feature Name 4	Fixed an issue where navigating to a record from a related contact's detail page blocked further navigation into that record's sub-sections.
Feature Name 5	Fixed an issue where tapping a specific notification type incorrectly redirected users to a different screen.

Android

User Fix

User	Fix
User Role 1	Fixed an issue that prevented certain users from starting new requests or ordering related services.
